

Developing a CMS-Powered Website for a Regional Business Enterprise

The client is a regional business enterprise based in North Karnataka, looking to strengthen its digital presence and convert online visitors into genuine leads.

Timeline:
1
MONTH

Business Situation

The enterprise had no online presence, no structured way to showcase its products online, no CMS to manage content independently, and limited visibility in search engines to get the conversion for their products. The business needed a partner who could deliver a fast, professional, SEO-ready website and hand over full control of it once the project was live.

What We Delivered

- Fully responsive website (desktop, tablet, mobile)
- Organized product listings with descriptions and images
- Integrated contact form for enquiries
- Foundational SEO setup: optimized images and metadata
- CMS access + training for independent content management
- Post-launch support for early issues and content changes

Our Approach

Discovery & Planning — Structured sessions to map business model, audience, and information architecture

UI/UX Design — Wireframes and mockups in Figma for Home, About, Products, and Contact

Development — Mobile-first, responsive build with foundational SEO (meta tags, clean URLs, structured headings)

Collaboration & Review — Dedicated project coordinator, milestone reviews at every stage

QA & Launch — Cross-browser/device testing before go-live

Key Outcome:

50 qualified leads converted in the first 15 days

82% increase in website traffic within 1 month

Stronger regional presence following launch
